ICONIC IN YOUR FUTURE

The multitude of token choices make it always difficult to know which one to choose from the multitude of existing tokens, because iconic stands out among the other currencies, a way beyond carrying a currency, because it is not just a currency, it is a functional ecosystem and with utility, even with built-in airdrops, decentralized exchange and launch pad aimed at the rewards market, profitable market, future P2E game (play to earn), keeping in mind the future of the currency by being deflationary with a burn and buyback control .

<https://iconic-metaverse.com/>

TOKEN: ICONIC

NETWORK: BINANCE SMART CHAIN

TICKER: \$ICM

NET SUPPLY: 100 MILLION

SOFT CAP: 100 BNB

HARD CAP: 200 BNB

PERSONAL MIN: 0,01 BNB

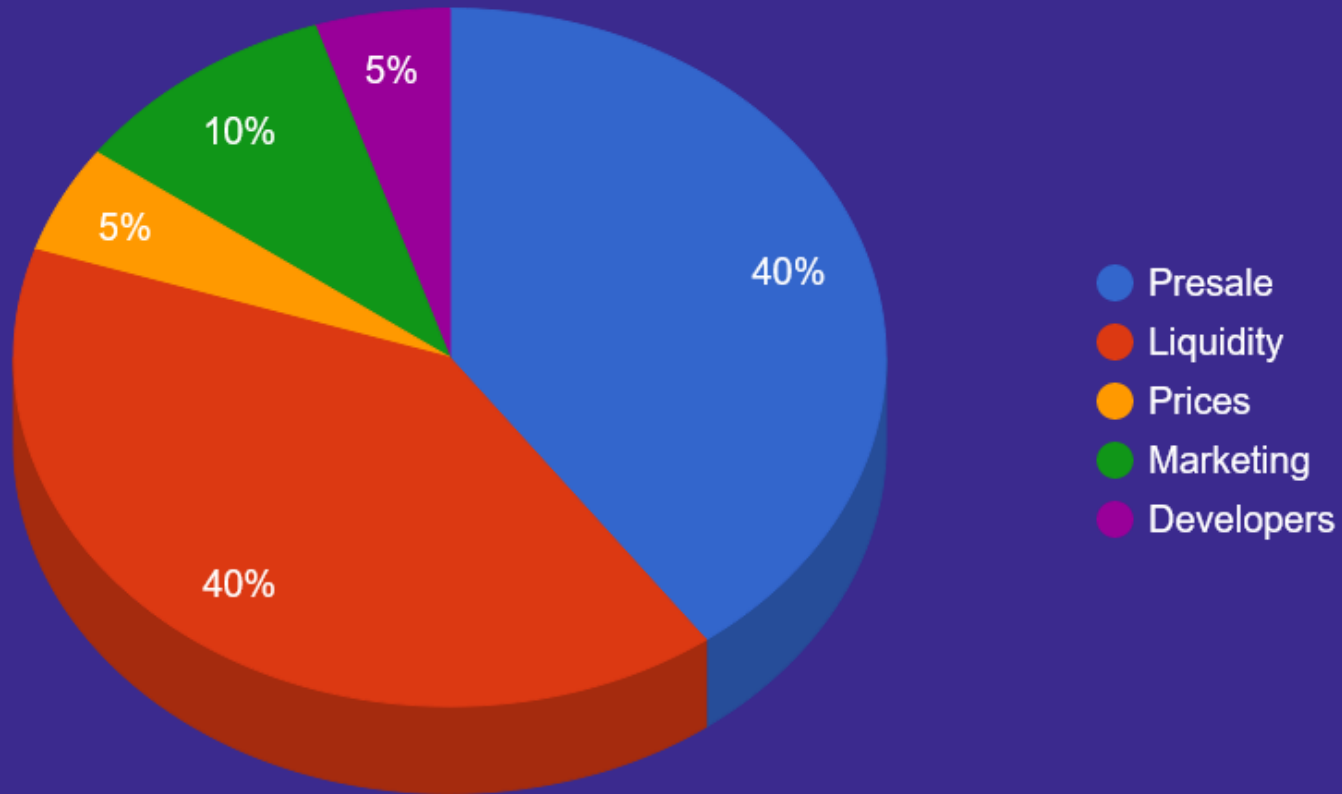

PERSONAL MAX: 3 BNB

ICONIC has a total of 100 million cap, a deflationary token that benefits all our holders. ICONIC offers investors an ecosystem where they can increase their crypto earnings simply by holding \$ ICM. Each investor receives its reward thanks to our financial model and clever coding. The project is based on a model designed to increase the user base and create a strong community. ICONIC has a profit system of 8% of each transaction in BUS D, all to reward its holders, finance marketing, development and liquidity.

Our Tokenomics

Tokenomics

- Iconic is one of the highest level tokens in the market, the visionary token of the present and the future, offering 8% in BUSD, a high reward for all our holders
- liquidity is the ability of a currency to easily convert to cash or other currencies.
On the other hand, high liquidity indicates that the market is stable, with few fluctuations in price. That is why at Iconic we have 40% Liquidity for each operation, which automatically contributes to a liquidity fund that is blocked in PancakeSwap. LP initially created by blocking BNB raised in pre-sale.

Our Tokenomics

- Regarding the burn, it is 4% for each transaction and 4% that will be distributed among all holders to have greater economic stability.
- TEAM, MARKETING&DEV
15% will be used for the development, operation and maintenance of it. 10% of the transactions will be destined to become BNB and is sent to the team's wallet. The collected tokens are used for salaries, iconic purchases, upgrades, settings to give a higher quality and liabilities for everyone. The other 5% of each transaction is converted into BNB and sent to the marketing portfolio, for marketing, development and improvement of the project.

- Airdrops: 5% will be allocated to the conversion of BNB and is directly sent to the group of draws, which will be in charge of making recurrent draws among the holders of the currency
- Public presale: 40% will be allocated to public presale.
